Office Action Summary

Art Unit: 3641

DETAILED ACTION

Election/Restriction

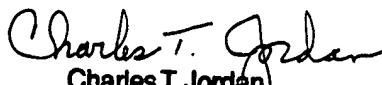

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 13-17, drawn to a fairing arrangement for an aircraft, classified in class 244, subclass 215.
 - II. Claims 11-12, drawn to a method of producing a flexible seal member, classified in class 425, subclass 500.
2. The inventions are distinct, each from the other because:

Inventions of a fairing arrangement for an aircraft of group I and method of producing a flexible seal member of group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case (a) the process as claimed can be practiced with another materially different product such as producing flexible seals for boats.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vagnola K. Comer. The examiner can normally be reached on Monday - Friday from 0730 to 1700.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Jordan, can be reached on (703) 306-4159.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-4177.
